QA Automation Engineer | Mobile Test Automation | API & UI Testing Expert

Professional Summary

Seasoned **QA Automation Engineer** with over **12 years of experience** in software testing, with a strong background in designing, developing, and maintaining **robust test automation frameworks** across web, mobile, and API platforms. Proficient in working with **Selenium, Appium, TestNG, Cucumber, BDD, Playwright, and REST Assured**. Demonstrated leadership as a team lead and mentor, contributing to agile teams in domains such as **Retail, Telecom, Utilities, Healthcare, and Banking**. Adept in **CI/CD integration**, defect tracking, and test planning.

Possesses **mobile automation expertise using Appium** and a solid understanding of QA best practices, test data management, and quality delivery. Comfortable working in **startup environments**, handling dynamic product testing requirements, and adapting rapidly to evolving tech stacks. A certified professional with a proven track record of accelerating software delivery while maintaining high-quality standards.

Work Authorization: H1B Visa (I-140 Approved) | Open to Visa Sponsorship

Key Skills

- **Test Automation:** Selenium WebDriver, Appium, Playwright, TestNG, Cucumber, BDD, Robot Framework (Python)
- **API Testing:** REST Assured, Postman
- **Languages:** Java, Python (basic), JavaScript (Playwright)
- **CI/CD & DevOps:** Jenkins, GitHub Actions
- **Test Management:** JIRA, qTest, HP ALM
- **Methodologies:** Agile (Scrum), Waterfall
- **Mobile Automation:** Android/iOS app testing using Appium
- **Database & Tools:** SQL, MySQL, Git, GitHub, MS Office, IntelliJ, Eclipse

Professional Experience

QA Automation Engineer

Cognizant

Feb 2020 – Present | Charlotte, NC

LPL Financial Project

- Lead the development of **modular and reusable automation frameworks** for UI and API testing using **Selenium, BDD, and a TestNG framework**.
- Designed and executed **mobile app automation scripts using Appium**, increasing mobile test coverage.
- Integrated automated suites with **CI/CD pipelines** via Jenkins for seamless regression testing.
- Performed **API validation using REST Assured and Postman** for backend service verification.
- **Worked in SQL** to validate backend data, manage test datasets, and ensure database integrity during test cycles.
- Created comprehensive test plans, managed test data, and participated in defect triaging and sprint planning.
- Collaborated with cross-functional teams in agile ceremonies, contributing to faster release cycles.
- Mentored junior QA engineers on automation standards and mobile testing approaches.

QA Automation Engineer

Tata Consultancy Services

Mar 2011 – Feb 2020

JetBlue Airways & Scottish Water Projects

- Built automation test suites for complex web applications using **Page Object Model (POM)** from scratch.
- Executed **functional, regression, smoke, and ad hoc testing** across multiple product lines.
- Utilized **JIRA/HP ALM** for bug tracking, test execution reporting, and defect life cycle management.
- Conducted **API and database testing**, ensuring reliable integrations and data consistency.
- Supported daily standups, release planning, and requirement analysis for offshore and onshore teams.
- Delivered production-ready automated regression packs, improving testing speed and accuracy.

Education

B.Tech in Information Technology

- Narula Institute of Technology - 2006 – 2010 | West Bengal, India

Certifications

- RPA Specialist – TricentisA
- Tosca Automation Specialist Level 1
- Scrum Certified
- GitHub Copilot for Developers
